

Invitation for the 2026 TDK conference of the Faculty of Earth and Environmental Sciences and Engineering

The Scientific Student Chapter of the Faculty of Earth Science and Engineering expects applications for the traditional “TDK” Conference (Hungarian abbreviation for the Scientific Students’ Association Conference – an educational competition for students developing R&D results beyond their ordinary exercises, supervised by a faculty professor). The expected time of the conference is the 27th of November 2026.

Deadline for the registration: 18 October 2026

Deadline for submitting the completed essays: 13 November 2026

To participate this competition, you need to write an essay introducing the topic, the background information, your own research activity (measurements, observations etc), results and conclusions in a form corresponding to scientific publications in general. Results already published or used in a former thesis work cannot be accepted.

Formal requirements of a thesis work can be used as a base, but the extent may be shorter, not longer than 50 pages. The deadline for submitting the completed essays is the **13rd of November**. Besides, the applicants must present the submitted work in 15 minutes in a conference session. The essays will be reviewed, the presentations will be discussed, and the best works will be prized by juries (professors and students of the faculty, who did not act as supervisors). Based on the decision of the session juries, the best ones will receive further awards and be promoted to the national level competition in the spring of 2027.

If You are prepared to participate (you have a topic, a title and abstract of the planned essay, and a supervisor who agrees with your proposal), please ask for further details Your supervisor! For examples of sessions, topics and abstracts please visit the TDK page of the faculty (<https://mfk.uni-miskolc.hu/studentscientific>) and download the program leaflets of previous conferences and the file containing the formal requirements!

Application process:

1. Register yourself on the university TDK homepage (<https://tdk.iit.uni-miskolc.hu/en>) and fill in the application form! The deadline is the **18th of October**.
2. Please print the application form and let your supervisor sign it!
3. Bring the signed paper and send the text files of your abstracts attached to an email to the secretary of the organising board on our faculty, Boglárka Anna Topa (building A/3, 3rd floor room 7, Institute of Exploration Geosciences, Department of Applied Mineralogy, e-mail: boglarka.topa@uni-miskolc.hu) until the 19th of October!

Completed essays have to be submitted in the above-mentioned ways in a pdf format until **the 13rd of November**. Further information on dates and to-dos will be sent to the applicants by e-mail. If the applicant will not be able to attend the conference in person at the university because of part-time study commitments abroad, hybrid participation can also be an option.

In case of any questions please write to the boglarka.topa@uni-miskolc.hu address.

Jó szerencsét! (Good Luck!)

The Scientific Student Associations Committee of the Faculty of Earth and Environmental Sciences and Engineering
